Kidist Kemal

Creative Developer | Turning Ideas into Useful Digital Experiences | Building Thoughtful, Human-Centered Products

Ethiopia · kidistkemal53@gmail.com · github.com/kikemal

PROFESSIONAL PROFILE

Creative developer and Information Technology student who enjoys solving problems, learning new technologies, and turning ideas into practical products. Experience spans web applications, an AI-powered decision platform, a queue-management product, and a student-monitoring system, including a first-place team win at the Cursor AI Hackathon Ethiopia. Looking for internship and freelance opportunities where curiosity and careful, human-centered design add value.

EDUCATION

Jimma University — BSc, Information Technology

2024 – 2027 (expected)

EXPERIENCE

Intern — Ministry of Innovation and Technology (MInT), Ethiopia

[Dates to be added]

SELECTED PROJECTS

HULUM — AI Opportunity Decision Platform

Deployed web application

- Built to help Ethiopian students and young professionals evaluate opportunities and decide whether to apply, investigate further, or skip.

Live demo: https://hulum-alpha.vercel.app/

AYNE — Voice-First AI Assistant

Team project · First place, Cursor AI Hackathon Ethiopia

- Contributed, as part of a team, to a voice-first assistant concept designed to support people with visual impairments.
- Team achievement: the AYNE team won first place at the Cursor AI Hackathon Ethiopia.

QueueLess — Queue Management

Product with working demo and business dashboard

- Developed a queue-focused product with a deployed application and a business dashboard, aimed at improving the queue experience for users and businesses.

School Monitoring System

Student progress tracking for parents

- Developed a system intended to help parents follow their children’s academic progress.
